

MAIN USERS — Kaun Use Karega Ye System?

Simple answer: **Ye ek B2G + B2B system hai (Business-to-Government + Business-to-Business), B2C nahi.** Consumer sirf indirect beneficiary hai, direct user nahi (Phase-3 tak).

Breakdown karte hain:

PRIMARY USERS (System inke liye BANA hai)

1. Legal Metrology Officers / Inspectors ☆ MAIN USER

Detail	Answer
Kaun	State LM Department ke field inspectors (~50,000 across India)
Kya karte hain	Dukaan/warehouse jaakar packets scan karte hain, violations record
Pain point jo solve hota hai	Manual checking 3-5 min/packet, rulebook yaad rakhna, evidence likhna
Kitna use karenge	Daily — 30–100 scans/day

2. District Controllers / Department Officials

Detail	Answer
Kaun	District level LM controllers, enforcement heads
Kya karte hain	Notices approve karte hain, inspectors ko assign karte hain, dashboards dekhte hain
Pain point	Repeat offenders ka record nahi hota, MIS reports manually banti hain
Kitna use karenge	Daily review + weekly reporting

3. Manufacturers / Packers / Importers (Businessmen) ☆ SECOND PILLAR

Detail	Answer
Kaun	FMCG companies, small packers, importers (10 lakh+ registered entities)
Kya karte hain	Self-audit — label launch hone se PEHLE check karte hain
Pain point	Violation ka pata market me pakde jaane ke BAAD chalta hai → penalty + recall cost
Kitna use karenge	Har naya product/SKU launch pe + rule change hone pe
Value prop	" <i>Prevention > Penalty</i> " — ₹10 ka sudhaar launch se pehle, ₹25,000+ penalty market se baad

🏆 SECONDARY USERS

4. State/National Level Admins

- Policy decisions, rules update karna (2017/2021 amendments), national heat-map dekhna, repeat-offender trends

5. E-commerce Platforms (Amazon/Flipkart/Meesho — B2B API clients)

- Bulk listing scanning via API, LM Rules 2022 (e-commerce declarations) compliance
- Ye "user" nahi but **client** hai — unke paas lakhon listings hain jo manually check impossible hai

6. Auditors / Higher officials (Read-only)

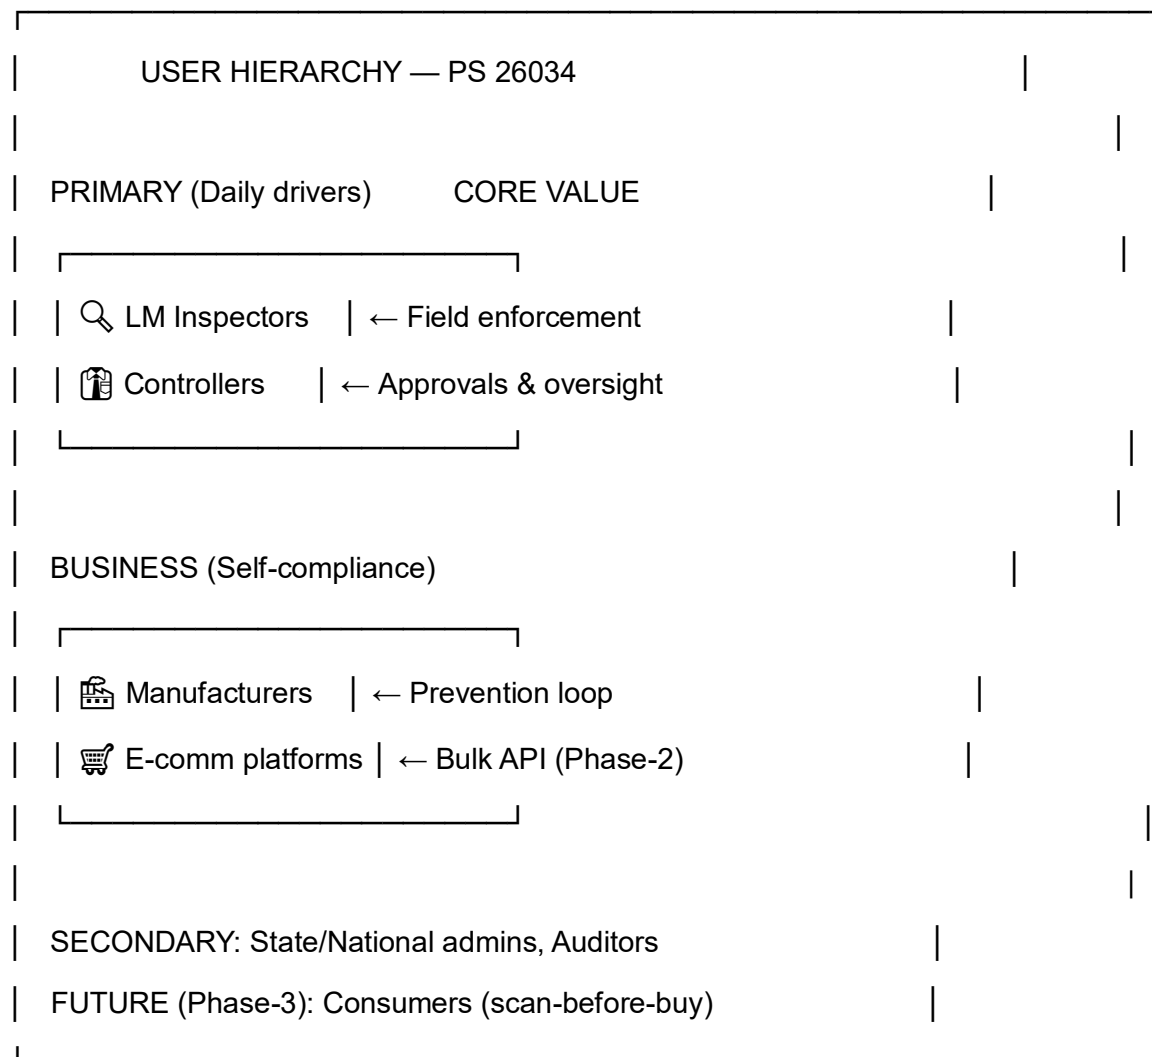

- Historical data search, reports download, evidence retrieval

🏆 TERTIARY USERS (Phase-3 — Future)

7. Consumers (Aam Aadmi / Market)

- **Abhi direct user NAHI** — indirect beneficiary (clean market)
- Phase-3 me: scan-before-buy app, complaint filing with photo evidence
- ⚠️ Ye judge ko clearly bolo — "consumer-facing feature roadmap me hai, but CORE system enforcement-grade hai, consumer app nahi"

🔗 One-Slide Summary (Presentation ke liye)

🔗 Judge Ke Liye Killer Framing

Agar pooche "main user kaun hai — consumer ya officer?":

"Sir, humara primary user GOVERNMENT OFFICER hai aur PRIMARY CUSTOMER bhi — kyunki problem statement LM department ki hai. Businessmen (manufacturers) humara second pillar hai — wo voluntarily self-audit karte hain taaki violation market tak pahunchne se pehle fix ho. Consumer DIRECT user nahi hai — consumer INDIRECT beneficiary hai, jaise traffic police ka system consumer ka direct app nahi hota but safe roads sabko milti hain. Haan, Phase-3 me consumer scan-before-buy feature add hoga — but wo expansion hai, core nahi."

Ye analogy strong hai: Traffic police system → safe roads. Humara system → safe labels. Consumer ko app ki zarurat nahi, result chahiye. ✓
